- FOREWORD -

When an extension specialist or worker undertakes to develop a new phase of home management extension work one of the first questions that come to mind is, "What literature have the extension service staffs of other States published on this subject?" This bibliography has been compiled to answer that question. It lists only the extension service publications relating to home management. Some topics, such as house heating and home-management phases of family relationships, are omitted entirely because as yet, there are almost no extension service publications on these topics. The publications are listed alphabetically according to States.

The first incentive for publishing useful, readable home-management bulletins and circulars is to answer the needs of rural women and 4-H club girls whom we serve. A second incentive, after looking over the bibliography, might be to keep up the excellent standards already set by the extension workers who have written the publications listed.
